

GLACIER GLADIATOR®

PRODUCT INFORMATION SHEET

DESCRIPTION:

Glacier Gladiator® is an advanced ice melt product composed of sodium chloride that is encapsulated with liquid magnesium chloride and an agriculturally derived corrosion inhibitor.

Glacier Gladiator®

- 60-70% less corrosive than salt
- Effective at temperatures below zero
- Safer for pets, plants, and people *
- Safer on concrete than other de-icers *
- Greater surface adherence, in addition to orange color for application visibility, saves time and material.
- Fast acting and long lasting performance reduces frequency of re-application

NOTICE:

Glacier Gladiator® is a proprietary mix of advanced deicing compounds designed to aggressively melt ice and snow at very low temperatures with less corrosion. *Although Glacier Gladiator® performs better and is safer than other de-icers, it must be used at the customer's risk. Because the time, place, rate of application, type and quality of surface, and other conditions of use are beyond the seller's control. To reduce the risk of damage, remove excess slush and water from treated surfaces. Not for food or drug use.

STORAGE:

Store in a cool, dry area.

AVAILABILITY:

Available in 50# poly bags

TECHNICAL INFORMATION:

For further product specifications and technical information, contact Haven Salt, 409 N. State St, Clarks Summit, PA 18411 by phone (570)-586-0100 or by fax (570)-586-0200
